ABOUT ME

With over five years of experience as a specialized full stack developer, I have cultivated a versatile skill set through diverse roles at prominent companies, including digital agencies, product firms, and the largest private bank in Myanmar. Currently, I am a Senior Software Engineer at Klink—a leading cloud-based communication platform. My proficiency spans frontend and backend development, with a keen focus on delivering high-quality solutions that cater to the unique needs of various organizations.

EXPERIENCE

Klink — Senior Software Engineer

Oct 2023 - Present

- Lead integration and maintenance of cloud-based contact center solutions, enhancing operational efficiency through utilization of Linkus SDK.
- Collaborate with designers to streamline search filter functionality, improving user interactions and comprehension.
- Develop and deploy robust, bug-free frontend code for software applications.
- Provide real-time support with web socket for monitoring agent online status.
- Mentor junior and mid-level developers to foster skill development and support business and operation teams as needed.

KBZ Bank — Frontend Software Engineer

Aung 2022 - Oct 2023

- Developed web applications displaying nearby bank, ATM, and service center locations based on geolocation.
- Created an online credit-card creation application, transitioning to paperless processes for environmental sustainability.
- Collaborated with designers and performance team to enhance site and blog user experience.
- Designed reusable core code libraries to drive team efficiency and ensure future-proof solutions.
- Collaborated with backend developers to design and build scalable database schemas and optimize data access layers.

Better HR — Senior Full Stack Web Developer

Jan 2019 - Aug 2022

- Deployed scalable web applications and APIs using PHP and Laravel, collaborating cross-functionally throughout the software development lifecycle.
- Managed MySQL and MongoDB databases with a focus on data integrity, performance, and security.
- Optimized code and development processes using GIT, contributing to successful project delivery from analysis to maintenance.

Nexlabs — Junior Web Developer

Jan 2018 - Dec 2018

- Collaborated across the software development lifecycle to deliver robust web and mobile applications.
- Provided technical solutions and leadership to ensure accurate and timely project delivery.
- Met project timelines consistently and provided regular status updates to address requirements and changes.
- Facilitated continuous learning for junior team members in emerging technologies to enhance team proficiency.
